RESPONSE TO AMENDMENT

1. This communication is responsive to the amendment received on June 22, 2005. Claim 1 has been amended. Claims 2-3 have been cancelled. Claims 1, and 4-16 are pending.

The old Rejection is Maintained

2. The rejection is respectfully maintained as set forth in the last Office Action mailed on March 10, 2005. Applicants' arguments with respect to claims 1, and 4-16 have been fully considered but they are deemed to be moot and old rejection is maintained.

Claim Rejections - 35 USC §102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

4. Claims 1-16, are rejected under 35 U.S.C. 102(e) as being anticipated by **Barchi** U.S. Patent No. **6,507,866**.

5. As to claim 1, Barchi multi-stage email interception method, comprising the steps of:

receiving an email message (see Fig. 1, col. 5, lines 59-62);

querying the receiving number corresponding to the email message from an array according to the related information of the email message (Fig. 1, col. 5, lines 44-54);

rejecting the email message if the receiving number is higher than a first setting value and the email conforms to the email characteristics recorded in a specific email record (col. 6, lines 38-53);

recording the email characteristics corresponding to the email message into the specific email record if the receiving number is higher than the second setting value and the email address of the recipient of the email message does not appear in the recipient field of the email message (col. 10, lines 17-26).

accepting the email message first and then deleting the email message if the receiving number is higher than a second setting value and the email address of the recipient of the email message does not appear in the recipient field of the email message (col. 8, lines 33-67).

accepting and forwarding the email message to a specific mailbox if the receiving number is higher than a third setting value and the email address of the recipient of the email message does not appear in the recipient field of the email message (col. 6, lines 26-37).

6. As to claim 4, Barchi teaches the method as claimed in claim 1 further recording the related information of the email message into the array (col. 6, lines 26-37).

7. As to claim 5, Barchi teaches the method as claimed in claim 1 wherein the array is a first-in-first-out array (see Fig. 2).

Art Unit: 2155

8. As to claim 6, Barchi teaches the method as claimed in claim 1 wherein the related information comprises the subject of the email message (col. 2, lines 14-24).

9. As to claim 7, Barchi teaches the method as claimed in claim 1 wherein the related information comprises the text information of the email message (col. 2, lines 14-24).

10. As to claim 8, Barchi teaches the method as claimed in claim 1 wherein the email characteristics comprise the network address of the host sending the email message (col. 1, lines 42-55).

11. As to claim 9, Barchi teaches the method as claimed in claim 1 wherein the email characteristics comprise the sender information (col. 1, lines 42-55).

12. As to claim 10, Barchi teaches the method as claimed in claim 9 wherein the sender information comprise the name of the sender (col. 1, lines 42-55).

13. As to claim 11, Barchi teaches the method as claimed in claim 9 wherein the sender information comprise the email address of the sender (col. 1, lines 42-55).

14. As to claim 12, Barchi teaches the method as claimed in claim 1 wherein the email characteristics comprise the subject (col. 2, lines 14-24).

15. As to claim 13, Barchi teaches the method as claimed in claim 1 wherein the recipient field comprises the field of direct recipients (col. 2, lines 14-24).

16. As to claim 14, Barchi teaches the method as claimed in claim 1 wherein the recipient field comprises the field of copy recipients (col. 2, lines 14-24).

17. As to claim 15, Barchi teaches the method as claimed in claim 1 wherein the recipient field comprises the field of hidden copy recipients (col. 2, lines 14-24).

18. As to claim 16, Barchi teaches the method as claimed in claim 1 wherein the first setting value is larger than the second setting value, and the second setting value is larger than the third setting value (col. 6, lines 38-53).

Response to amendment

19. Applicant's arguments filed have been fully considered but they are not persuasive.

In the remarks, the applicant argues in substance that Barchi does not teach all the limitations of claim 1.

Barchi teaches a method and apparatus for identifying undesired e-mail messages by receiving e-mail messages, storing fields, and analyzing the stored fields for at least one pattern indicative of undesired e-mail messages. Barchi teaches that if an e-mail messages from a single sender exceeds an absolute threshold or percentage threshold that a flag is set that alerts monitoring functions and update lists of known types of undesired e-mail messages for filtering; therefore Barchi meets the scope of the claimed limitation (see col. 5, lines 36-54).
